Research Papers

Studies on the infiltration–discharge of rain water and translation phenomena in soil
S. Ogawa, Y. Kishi (Matsuyama, Japan) and A. Yamada (Imabari, Japan) 1
'Acidic episodes' in surface waters in Europe
T.D. Davies (Norwich, UK), M. Tranter (Southampton, UK), P.J. Wigington, Jr. (Corvallis, OR, USA) and K.N. Eshleman (Charlottesville, VA, USA) 25
Estimation of the diurnal variation of potential evaporation from a wet bare soil surface
M.B. Parlange and G.G. Katul (Davis, CA, USA) 71
Estimation of bare soil evaporation using skin temperature measurements
G.G. Katul and M.B. Parlange (Davis, CA, USA) 91
The Nubian Sandstone aquifer in the central and northern Negev, Israel: delineation of the hydrogeological model under conditions of scarce data
E. Rosenthal, B. Berkowitz (Jerusalem, Israel), G. Weinberger, A. Flexer and J. Kronfeld (Tel Aviv, Israel) 107
Pumping test data analysis in wells with multiple or long screens
F. Székely (Budapest, Hungary) 137
An improved first-order reliability approach for assessing uncertainties in hydrologic modeling
C.S. Melching (Piscataway, NJ, USA) 157
An automated method for representing, tracking and forecasting rain fields of severe storms by Doppler weather radars
Z.Q. Chen and M.L. Kavvas (Davis, CA, USA) 179
Paleohydrologic implications of some deep soilwater chloride profiles, Murray Basin, South Australia
W.J. Stone (Socorro, NM, USA) 201
The water resources of the Great Oolite aquifer in the Thames Basin, UK
K.R. Rushton, L.M. Tomlinson (Birmingham, UK) and M. Owen (Reading, UK) 225
Rainfall partitioning by a semideciduous forest grove in the savannas of the Orinoco Llanos, Venezuela
J.J. San Jose and R. Montes (Caracas, Venezuela) 249
Modelling surface runoff contamination by soil chemicals under transient water infiltration
R. Wallach and R. Shabtai (Rehovot, Israel) 263
Groundwater flow, velocity, and age in a thick, fine-grained till unit in southeastern Wisconsin
W.W. Simpkins (Ames, IA, USA) and K.R. Bradbury (Madison, WI, USA) 283
Factors controlling the effects of climate change on river flow regimes in a humid temperate environment
N.W. Arnell (Wallingford, UK) 321
Principal component analysis of a river basin discharge and precipitation anomaly fields associated with the global circulation
K. Pandžić and D. Trninić (Zagreb, Yugoslavia) 343
Manning coefficient of roughness — a case study along Soreq stream, 1971–1981
B. Azmon (Haifa, Israel) 361

Book Reviews

Surface Coal Mining Effects on Ground Water Recharge 379
Opportunities in the Hydrologic Sciences 380
The Gamma Family and Derived Distributions Applied in Hydrology 383
